

Welcome to Life-Link.app

Life-Link.app is a new iOS and Android application for phones and tablets, created by a retired health professional, to help provide peace of mind for people living alone and for their family, friends and carers who are concerned about them.

Not a replacement for emergency services

Caring for people living alone

Invite only!

Sam asked his mother Rose to use **Life-Link.app** to check-in each day. Rose also asked a kind neighbour; Nina to be an Emergency Contact, just in case!

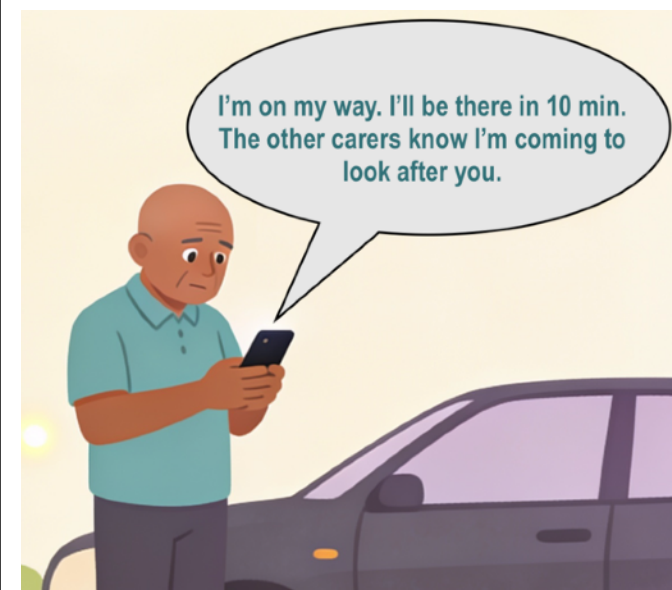

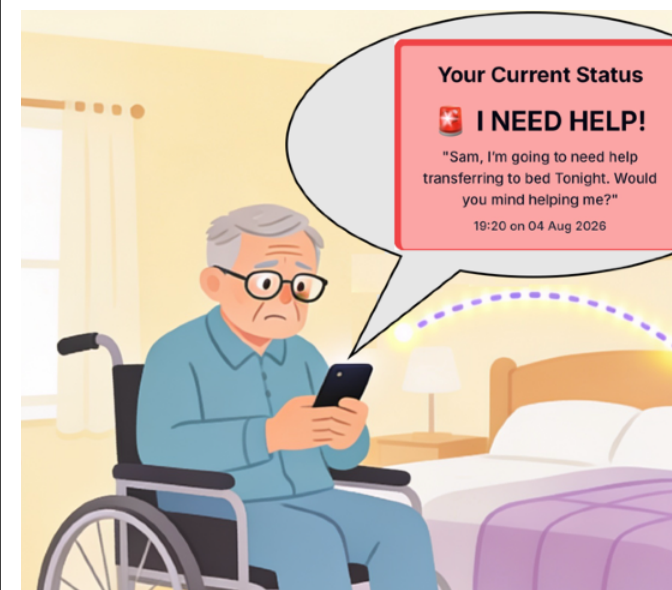

3

For the disabled and their carers

Life-Link.app can help people with disabilities and their carers stay connected with private check-ins and urgent **I NEED HELP!** alerts*.

** NOT a replacement for using Emergency Services.*

About the creator of Life-Link.app

Created by a retired Australian paramedic to help people share wellbeing simply with those they trust. Using everyday check-ins like **I'M OK**, or a clear... **I NEED HELP!** when support is needed most.
Not a replacement for emergency services

Who's it for?

Older adults living alone, and adult children or carers who want peace of mind, from near or far.

Invite only!

Users choose their who there contacts will be. Private circle only. No strangers and no social media noise.

Current features

Wellbeing status posts · Timeline · **I NEED HELP!** alerts · optional location during an active help status · private chat · optional medical notes and medication lists on your profile · optional wellbeing context (smart ring / Health app)—all member-controlled.

Looking ahead

Ambition: one day, certified health-app capabilities with compatible wearables.

Today: optional context and smart-ring trials—not clinical monitoring.

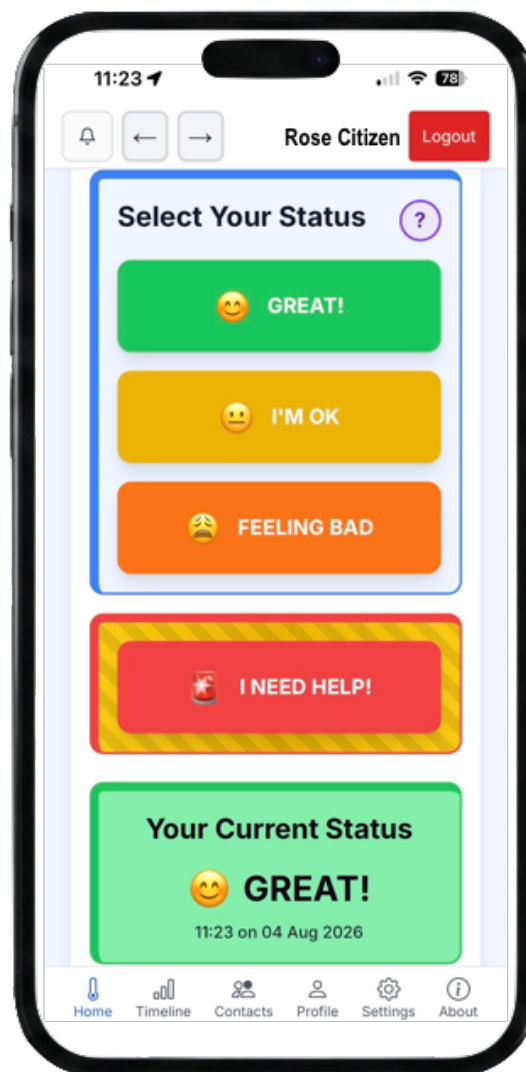

Not a substitute for calling 000 in an emergency.

Life is short — connections matter

Check in — Stay connected — Get help to the right people, faster.

Features and Home screenshot

Wellbeing status posts — Timeline — “I NEED HELP!” alerts — Optional location sharing in an emergency — Private chat with contacts — Future wellbeing data (via a compatible smart ring or Health app)— Everything is user-controlled, for your security.

Feedback and Suggestions

I'm seeking input from individuals, and organisations that may have some constructive ideas that I may be able to include in future updates. So please contact me to discuss them as soon as possible.

Life-Link.app is self-funded by the author. If it helps your family, support toward ongoing development is most welcome.
